

Gabriela Gatti Rodrigues

Analytics, CRM & Customer Intelligence Specialist

São Paulo, Brazil · +55 11 97189-0101 · gabi.gatti.rodrigues@gmail.com · [linkedin.com/in/gabriela-gatti-rodrigues](https://www.linkedin.com/in/gabriela-gatti-rodrigues)

PROFESSIONAL SUMMARY

Analytics, CRM and Customer Intelligence specialist with more than 10 years of experience turning data into strategic decisions for technology, retail, financial services and marketplace companies.

I built my career connecting data science, consumer behavior and business strategy to drive retention, growth, monetization and operational efficiency. I have worked at organizations such as Petlove, iFood, Will Bank, 99, Pernambucanas, Banco Carrefour and MaxMilhas, building analytical solutions that support executive decisions and have a direct impact on results.

I have solid experience building statistical models, predictive analytics, CRM analytics, Customer Lifetime Value (CLV), segmentation, churn prediction, RFM, behavioral modeling and strategic KPI measurement — always translating large volumes of data into actionable recommendations for Marketing, CRM, Product, Sales and Finance.

What defines my work is connecting technical depth to business judgment: influencing stakeholders, simplifying complex analysis, and helping organizations build data-driven strategy.

Throughout my career I have helped move Analytics beyond a support function and into a strategic driver of sustainable growth, better customer experience and evidence-based decision-making.

EDUCATION

- Certificate in Marketing, Insper | Completed 2016
- Bachelor's degree in Statistics, University of São Paulo (USP) | Completed 2009

LANGUAGES

- Portuguese — Native
- English — Advanced
- Italian — Intermediate

PROFESSIONAL EXPERIENCE

Petlove

Nov 2024 – May 2026

Senior Data Analyst

- Strategic work alongside CRM and Retention, building predictive models that anticipate customer behavior and support loyalty and base-growth decisions.
- Statistical models using Generalized Additive Models (GAM) to identify renewal propensity for the discount club, enabling sharper segmentation across the customer lifecycle.
- Customer Lifetime Value models (BG/NBD + Gamma-Gamma) supporting financial projections, strategic planning and predictive revenue analysis.
- Executive dashboards with generative-AI features, letting business teams run exploratory analysis, find root causes and get real-time insights on their own.
- Close partnership with business teams, translating complex analysis into strategic recommendations for CRM and customer-experience decisions.

Results

- ✓ Stronger CRM strategy, with predictive segmentation and more precise relationship actions.
- ✓ More autonomy for business teams to use data, with fewer ad hoc requests and faster decisions.
- ✓ Higher analytics maturity, connecting data science to business priorities.

iFood

Apr 2024 – Sep 2024

Senior BI Analyst

- Analytical solutions supporting the card-machine vertical's operations, widening visibility over critical indicators and speeding up decisions.
- Strategic dashboards in ThoughtSpot and Google Sheets, centralizing the operational indicators business teams tracked daily.
- Led the migration of analyses into more accessible, collaborative environments, democratizing access to information and raising operational efficiency.
- Strategic analysis for different stakeholders, supporting data-driven decisions in a fast-moving, constantly evolving environment.

Results

- ✓ Visibility into operational performance with consolidated, real-time indicators.
- ✓ Less time to reach strategic information and faster decision-making.

Will Bank

Sep 2023 – Mar 2024

Business Analyst

- Worked with the finance areas, developing strategic analysis to support critical business decisions.
- Optimized SQL queries and analytical processes, cutting processing time and getting information to leadership faster.
- Built data validation and governance processes, raising the reliability of the analysis behind financial decisions.
- Executive dashboards and analytical studies investigating the indicators that mattered to each area of the organization.

Results

- ✓ Greater operational efficiency, with optimized analytical processes and faster answers to business teams.
- ✓ More reliable data for the finance team's critical decisions.

Quod

Dec 2022 – Sep 2023

Data Specialist

- Strategic projects on the evolution of the data architecture and the analytical impact of structural changes.
- Impact analysis across data loads, processes and code changes, ensuring operational continuity and information quality.
- Technical support to the Analytics team during data-transformation work, keeping the analytical bases consistent and intact.

Results

- ✓ Operational continuity while the data architecture evolved, with no loss of data integrity.
- ✓ Lower risk in structural changes, through impact analysis and technical validation.

MaxMilhas

Dec 2021 – Nov 2022

Data Specialist

- Owned the validation of the data used by CRM for customer acquisition and retention campaigns.
- Built data quality and governance processes, reducing inconsistencies and making segmentation more reliable.
- Analytical documentation and a variable book, speeding up queries, analysis and new studies across teams.

Results

- ✓ Stronger governance and quality of CRM data, with fewer inconsistencies and less rework.
- ✓ More precise segments and campaigns, and faster insights for CRM and Marketing.

99

May 2021 – Dec 2021

CRM Data Specialist

- Journey and lifecycle analysis for partner restaurants, supporting retention and growth strategies.
- Statistical churn-prevention models that let CRM teams act before the loss.
- Automation of analytical processes and data-quality controls, driving greater operational efficiency.

Results

- ✓ Early identification of risk factors across the partner lifecycle.
- ✓ Preventive action by CRM teams, backed by predictive models.

Pernambucanas | Pefisa

Jul 2018 – May 2021

Senior Customer Intelligence Analyst

- Strategic work with CRM, Marketing and Financial Products, using analytics to support segmentation, retention and customer-relationship decisions.
- Statistical models and RFM segmentations used as the basis for targeted campaigns and commercial strategies.
- Consulting projects for financial products and insurance, building analytical models to support business teams.
- Technical reference for the team, supporting colleagues' development, stakeholder alignment and the evolution of analytical practices.

Results

- ✓ Strategic segmentations that came to guide CRM and Marketing campaigns.
- ✓ Raised the team's analytics maturity as its technical reference.
